David Moreno

In recent decades, orthodontics has undergone a complete evolution. New 3D technology gives us tools to change our conventional way of treating our patients to a more individual level.

The methods to achieve an accurate diagnosis have become much more extensive. 3D intraoral scanning combined with associated software allowed practitioners to achieve much more precise treatment plans.

Every patient is unique, so is it a must to follow the trend and offer more precise and efficient solutions to our patients?

Is the future of orthodontics going digital? Does digital provide at least the same, or even a better treatment accuracy? The answers to these two questions are key to deciding if today's digital technology can improve the bonding protocol. In the past, Indirect Bonding involved many steps in the laboratory process that made it technique sensitive. At this time the combination of Intra-oral Scanning, digital workflows together with disruptive developments like 3M™ APC™ Flash-Free can make the difference.

Discover in this theoretical-practical course, from 3M and Ortoplus, the advantages that the Digital Indirect Bonding with 3M™ APC™ Flash-Free can bring you.

You will be amazed!

# Agenda

10:30 - 10:50 *Welcome coffee*

---

10:50 - 11:00 **Welcome and intro.**

11:00 - 11:45 **Why Digital Flash-Free Indirect Bonding?**

11:45 - 12:30 **The complete Digital Workflow for brackets placement (From stl file import to final bracket check by doctor).**

12:30 - 12:45 **The complete Digital Workflow for brackets placement (From stl file import to final bracket check by doctor – Real case).**

12:45 - 13:00 **Design of the Indirect Bonding tray using Appliance designer Software.**

13:00 - 13:15 **Printing and preparation of the Indirect Bonding Tray.**

13:15 - 13:30 **Software Tips & Tricks.**

---

13:30 - 14:30 *Lunch*

---

14:30 - 15:00 **Digital Indirect Bonding Clinical Part.**

15:00 - 15:45 **Hands on part.**

15:45 - 16:00 **Q&A and Wrap Up.**

16:00 - 16:30 **Visit to Laboratory**

### **Dr Isabelle Savoye**

Dr Savoye graduated as a dentist in 1993 and obtained the title of Specialist in Orthodontics and Dentofacial Orthopedics in 1997, both at KU Leuven University (Belgium).

In 2013, full digitization was acquired in their group practice, Liedent, with the purchase of an intra-oral mouth scanner. Afterwards, they also invested in a dental 3D printer to complete the CAD-CAM circle.

Savoye immerses herself further in digital dentistry through self-study, she mainly attends foreign conferences and is a member of the AAO, WFO and EOS.

Moreover, she provides trainings on the OrthoAnalyzer™ software for digital planning and the Appliance Designer™ that enables CAD design of dental devices, exclusively for orthodontists.

### **Mrs Marlyn Van Cutsem**

She's been working for Dr Isabelle Savoye at the practice (Liedent) since February 2003 as:

- Orthodontic chairside assistant
- Lab assistant
- Model segmentation
- Preparing bracket placements
- Designing & fabricating orthodontic appliances: retainers, aligners, palatal expanders, herbst appliances
- 3D printing: models, splints, indirect bonding trays

### **Mr David Moreno**

My passion for orthodontics started 26 years ago when I started working as a Sales Representative for 3M orthodontic products. After carrying out various assignments locally and internationally, I was appointed Head of Marketing Operations for Europe.

I currently have the privilege of leading the 3M education for orthodontics in Europe. Every post has come with different challenges and achievements and I feel blessed to have enjoyed every post within 3M orthodontics.

I am particularly passionate about my role within 3M orthodontic education. Through education, we discover trends in the market, what our clients require and how they would benefit from new products, and we educate our customers on appropriate and successful use of our new products. In addition to this, we also create a community of bringing not just orthodontists together but also the orthodontists and us as 3M product manufacturers. These are the reasons that make me feel so passionate about my existing role.
